Project Title	Funding	Institution	
Are neuronal defects in the cerebral cortex linked to autism?	\$0	Memorial Sloan-Kettering Cancer Center	
Neural mechanisms underlying an extended multisensory temporal binding window in ASD	\$0	Vanderbilt University	
Neurobiological mechanisms of insistence on sameness in autism	\$0	University of Illinois at Chicago	
Alterations in brain-wide neuroanatomy in autism mouse models	\$0	Cold Spring Harbor Laboratory	
Collaborative research: The path to verb learning	\$0	Temple University	
Collaborative research: The path to verb learning	\$0	University of Delaware	
CAREER: Model-based fMRI of human object recognition	\$0	Georgetown University	
A developmental social neuroscience approach to perception-action relations	\$0	Temple University	
MEG investigation of phonological processing in autism	\$0	University of Colorado Denver	
Collaborative research: Learning complex auditory categories	\$0	Carnegie Mellon University	
Collaborative research: RUI: Perceptual pick-up processes in interpersonal coordination	\$0	College of the Holy Cross	
Dimensions of mind perception	\$0	Harvard University	
Exploring the uncanny valley	\$0	Carnegie Mellon University	
Collaborative research: Modeling perception and memory: Studies in priming	\$0	University of California, San Diego	
Infants' developing representation of object function	\$0	University of California, Davis	
Collaborative research: Modeling perception and memory: Studies in priming	\$0	Indiana University	
Brain circuitry in simplex autism	\$0	Washington University in St. Louis	
Collaborative research: Learning complex auditory categories	\$0	University of Arizona	
ACE Center: Diffusion tensor MRI + histopathology of brain microstructure + fiber pathways	\$1	University of Pittsburgh	
CDI-TYPE II: From language to neural representations of meaning	\$0	Carnegie Mellon University	
HCC:Small:Computational studies of social nonverbal communication	\$0	University of Southern California	
Multiple systems in theory of mind development	\$0	Rutgers, The State University of New Jersey - New Brunswick	
Perturbed cortical patterning in autism	\$0	Seattle Children's Hospital	
Synchronous activity in networks of electrically coupled cortical interneurons	\$0	University of California, Davis	
CAREER: Integrative behavioural and neurophysiological studies of normal and autistic cognition using video game environments	\$0	Cornell University	
CAREER: The role of prosody in word segmentation and lexical access	\$0	Michigan State University	
CAREER: Dissecting the neural mechanisms for face detection	\$0	California Institute of Technology	
Global & targeted profiling of protein, phospho and O-GlcNAc to understand synapses	\$994	University of California, San Francisco	
Neuroligins and neurexins as autism candidate genes: Study of their association in synaptic connectivity	\$0	University of California, San Diego	
Behavioral and functional neuroimaging investigations of visual perception and cognition in autistics	\$0	Université de Montréal	

Project Title	Funding	Institution	
The neural correlates of transient and sustained executive control in children with autism spectrum disorder	\$0	University of Missouri	
Development of brain connectivity in autism	\$0	New York School of Medicine	
Architecture of myelinated axons linking frontal cortical areas	\$0	Boston University	
Phonological processing in the autism spectrum	\$0	Heriot-Watt University	
Imaging synaptic neurexin-neuroligin complexes by proximity biotinylation: Applications to the molecular pathogenesis of autism	\$0	Massachusetts Institute of Technology	
fMRI studies of cerebellar functioning in autism	\$0	University of Illinois at Chicago	
Linguistic perspective-taking in adults with high-functioning autism: Investigation of the mirror neuron system	\$0	Carnegie Mellon University	
Novel approaches for investigating the neurology of autism: Detailed morphometric analysis and correlation with motor impairment	\$0	Kennedy Krieger Institute	
Role of autism-susceptibility gene, CNTNAP2, in neural circuitry for vocal communication	\$0	University of California, Los Angeles	
Role of negative regulators of FGF signaling in frontal cortex development and autism	\$0	University of California, San Francisco	
Characterization of the pathological and biochemical markers that correlate to the clinical features of autism	\$0	Research Foundation for Mental Hygiene, Inc.	
Roles of miRNAs in regulation of Foxp2 and in autism	\$0	Louisiana State University	
Excessive cap-dependent translation as a molecular mechanism underlying ASD	\$0	New York University	
Characterization of the pathological and biochemical markers that correlate to the clinical features of autism	\$0	Research Foundation for Mental Hygiene, Inc.	
Characterization of the pathological and biochemical markers that correlate to the clinical features of autism	\$0	Research Foundation for Mental Hygiene, Inc.	
Developing novel automated apparatus for studying battery of social behaviors in mutant mouse models for autism	\$0	Weizmann Institute of Science	
Serotonin signal transduction in two groups of autistic patients	\$0	University of Illinois at Chicago	
Attentional distribution and word learning in children with autism	\$0	Brown University	
Ube3a requirements for structural plasticity of synapses	\$0	University of North Carolina at Chapel Hill	
Learning in autism spectrum disorders	\$0	University of California, Davis	
Self-injurious behavior: An animal model of an autism endophenotype	\$0	University of Florida	
Neural basis of empathy and its dysfunction in autism spectrum disorders (ASD)	\$0	Duke University	
Dendritic organization within the cerebral cortex in autism	\$0	The Open University	
Macrocephalic autism: Exploring and exploiting the role of PTEN	\$28,000	University of Wisconsin - Madison	
Preference acquisition in children and adolescents with and without autism spectrum disorder	\$28,000	Dalhousie University	
Functional analysis of EFR3A mutations associated with autism	\$31,250	Yale University	

Project Title	Funding	Institution
Frontostriatal synaptic dysfunction in a model of autism	\$48,398	Stanford University
Stimulus-driven attention deficits in autism	\$60,000	University of Minnesota
Regulation of activity-dependent ProSAp2 synaptic dynamics	\$33,879	Stanford University
Transcriptional responsiveness in lymphoblastoid cell lines	\$52,863	University of Pennsylvania
Glutamate signaling in children with autism spectrum disorder	\$57,840	University of California, Davis
Functional analysis of neurexin IV in Drosophila	\$68,652	University of California, Los Angeles
Head-fixed recording of sensory learning in mouse autism models	\$60,000	Princeton University
Functional properties and directed connectivity in the face-processing network	\$53,042	Yale University
Elucidation of the developmental role of Jakmip1, an autism-susceptibility gene	\$31,042	University of California, Los Angeles
Neural mechanisms of imitative behavior: Implications for mental health	\$32,696	University of California, Los Angeles
Using fruit flies to map the network of autism-associated genes	\$31,249	University of California, San Diego
Cortical microcircuit dysfunction as a result of MET deficiency: A link to autism	\$33,955	Northwestern University
Multisensory integration and temporal synchrony in autism	\$35,100	University of Rochester
Presynaptic regulation of quantal size by the cation/H+ exchangers NHE6 & NHE9	\$29,650	University of California, Berkeley
fMRI study of reward responsiveness of children with autism spectrum disorder	\$53,566	University of California, Los Angeles
Brain lipid rafts in cholesterol biosynthesis disorders	\$60,480	Medical College of Wisconsin
Early expression of autism spectrum disorder in experimental animals	\$54,000	Neurochlore
Role of neurexin in the amygdala and associated fear memory	\$25,000	Columbia University
Behavioral and neural correlates of reward motivation in children with autism spectrum disorders	\$27,554	University of North Carolina at Chapel Hill
CAREER: Typical and atypical development of brain regions for theory of mind	\$27,670	Massachusetts Institute of Technology
Corticothalamic circuit interactions in autism	\$50,000	Boston Children's Hospital
Neural systems for the extraction of socially-relevant information from faces	\$51,783	Dartmouth College
Multimodal studies of executive function deficits in autism spectrum disorders	\$51,942	Massachusetts General Hospital
Role of GluK6 in cerebella circuitry development	\$55,826	Yale University
Investigation of social brain circuits in mouse models of the 16p11.2 locus	\$87,500	Cold Spring Harbor Laboratory
Investigating brain connectivity in autism at the whole-brain level	\$90,000	California Institute of Technology
Social behavior deficits in autism: Role of amygdala	\$92,074	State University of New York Upstate Medical Center
Neurocognitive mechanisms underlying children's theory of mind development	\$74,160	University of California, San Diego

Project Title	Funding	Institution	
Cellular characterization of Caspr2	\$24,666	University of California, San Diego	
Action anticipation in infants	\$98,745	University of Chicago	
How autism affects speech understanding in multitalker environments	\$143,264	University of Maryland, College Park	
The integration of interneurons into cortical microcircuits	\$75,000	New York University School of Medicine	
PI3K/mTOR signaling as a novel biomarker and therapeutic target in autism	\$100,000	Emory University	
Cognitive control of emotion in autism	\$103,256	University of Pittsburgh	
MEG investigation of the neural substrates underlying visual perception in autism	\$128,798	Massachusetts General Hospital	
Defining the dynamics of the default network with direct brain recordings and functional MRI	\$144,317	University of Washington	
White matter glial pathology in autism	\$145,689	East Tennessee State University	
Development of ventral stream organization	\$137,338	University of Pittsburgh	
The role of CNTNAP2 in embryonic neural stem cell regulation	\$75,000	Johns Hopkins University School of Medicine	
Monolingual and bilingual infants' sensitivity to agreement morphology in Spanish	\$143,650	Florida International University	
A functional genomic analysis of the cerebral cortex	\$85,471	University of California, Los Angeles	
Neural mechanisms for social cognition in autism spectrum disorders	\$112,523	Massachusetts Institute of Technology	
Anatomy of primate amygdaloid complex	\$75,629	University of California, Davis	
Autism spectrum disorders and the visual analysis of human motion	\$125,000	Rutgers, The State University of New Jersey	
The role of Fox-1 in neurodevelopment and autistic spectrum disorder	\$145,757	University of California, Los Angeles	
Neuroligin, oxidative stress and autism	\$75,000	Oklahoma Medical Research Foundation	
ATHFR functional polymorphism C677T and genomic instability in the stiology of idiopathic autism in simplex families	\$114,984	Queen's University	
Role of micro-RNAs in ASD affected circuit formation and function	\$127,383	University of California, San Francisco	
Neuropathology of the social-cognitive network in Autism: a comparison with other structural theories	\$100,198	University of Oxford	
Experience and cognitive development in infancy	\$100,798	University of California, Davis	
ace perception: Mapping psychological spaces to neural responses	\$79,992	Stanford University	
Controlling interareal gamma coherence by optogenetics, pharmacology and behavior	\$83,521	Massachusetts Institute of Technology	
MET signaling in neural development and circuitry formation	\$83,810	University of Southern California	
earning and compression in human working memory	\$84,000	Harvard University	
Fo study the relationship between decreased hepatocyte growth factor HGF) and glutamate excitotoxicity in autistic children	\$7,228	Health Research Institute/Pfeiffer Treatment Center	
Multidimensional impact of pain on individuals and family functioning in ASD	\$13,000	The Research Foundation of the State University of New York	

Project Title	Funding	Institution
Structural brain differences between autistic and typically-developing siblings	\$13,020	Stanford University
Enhancing neurobehavioural and clinical definitions in autism spectrum disorders	\$14,000	Monash University
Neuropeptide regulation of juvenile social behaviors	\$14,755	Boston College
Behavioral and neural responses to emotional faces in individuals with ASD	\$14,935	Harvard University
Abnormal connectivity in autism	\$15,000	University of California, Los Angeles
The neural basis of weak central coherence in autism spectrum disorders	\$13,040	Yale University
Neuroprotective effects of oxytocin receptor signaling in the enteric nervous system	\$25,000	Columbia University
Neural underpinning of emotion perception and its disorders	\$15,000	Dartmouth College
Neurexin-neuroligin trans-synaptic interaction in learning and memory	\$200,000	Columbia University
Decoding 'what' and 'who' in the auditory system of children with autism spectrum disorders	\$237,000	Stanford University
RI: Small: Addressing visual analogy problems on the raven's intelligence test	\$165,546	Georgia Tech Research Corporation
Multimodal brain imaging in autism spectrum disorders	\$167,832	University of Washington
Diffuse optical brain imaging	\$182,022	National Institutes of Health
Structural and functional connectivity of large-scale brain networks in autism spectrum disorders	\$168,978	Stanford University
Multimodal analyses of face processing in autism & down syndrome	\$182,882	University of Massachusetts Medical School
Identification of candidate genes at the synapse in autism spectrum disorders	\$169,422	Yale University
EEG-based assessment of functional connectivity in autism	\$175,176	Kennedy Krieger Institute
Metacognition in comparative perspective	\$210,896	University at Buffalo, The State University of New York
Neurobehavioral investigation of tactile features in autism spectrum disorders	\$159,480	Vanderbilt University
Regulation of synaptogenesis by cyclin-dependent kinase 5	\$180,264	Massachusetts Institute of Technology
Communicative and emotional facial expression production in children with autism	\$171,215	University of Massachusetts Medical School
A neural model of fronto-parietal mirror neuron system dynamics	\$183,344	University of Maryland, College Park
Cognitive control in autism	\$152,627	University of California, Davis
Neural basis of cross-modal influences on perception	\$154,104	University of California, San Diego
Motor control and cerebellar maturation in autism	\$157,148	University of Texas Southwestern Medical Center
ACE Center: Imaging the autistic brain before it knows it has autism	\$197,682	University of California, San Diego
Canonical neural computation in autism spectrum disorders	\$200,717	New York University

Project Title	Funding	Institution	
Atypical late neurodevelopment in autism: A longitudinal MRI and DTI study (supplement)	\$154,416	University of Utah	
Neurobiological signatures of audiovisual speech perception in children in ASD	\$240,420	Haskins Laboratories, Inc.	
Neocortical mechanisms of categorical speech perception	\$240,744	University of California, San Francisco	
In vivo targeted gene silencing, a novel method	\$218,472	Indiana University-Purdue University Indianapolis	
Neuroimaging of social perception	\$242,812	University of Virginia	
ACE Center: Disturbances of affective contact: Development of brain mechanisms for emotion	\$157,294	University of Pittsburgh	
Perturbed activity-dependent plasticity mechanisms in autism	\$158,034	Harvard Medical School
